

CORPORATE PRESENTATION

MOSTAQBAL
ENGINEERING AND ENVIRONMENTAL CONSULTANTS

OVERVIEW

Founded in **1978** as ACEPO (Amman Consulting Engineering and Planning Office), MOSTAQBAL has a track record of utilizing top expertise across the engineering industries to provide high-level consulting solutions to our clients in both the public and private sectors.

CLASSIFICATION

Classified as **Grade 1A** by the Jordanian Ministry of Public Works and Housing in: **Buildings, Water & Wastewater, Roads, and Environment**

Classified by the Jordan Engineers Association in: architecture, structural engineering, mechanical engineering, electrical engineering and power, surveying, urban planning, water and wastewater, roads, bridges, traffic, project management, environment, and renewable energy

Accredited by the Jordanian Ministry of Environment as **Authorized Environmental Consultants and Auditors**

هيئة المكاتب والشركات الهندسية
Offices and Engineering Companies Authority

CERTIFICATION

MOSTAQBAL adheres to international quality standards and implements rigorous measures for quality assurance, environmental, and occupational health and safety. We continuously evolves to meet new business challenges.

ISO-certified in **Quality, Occupational, Health, Safety** and **Environment**

MEMBERSHIP

MOSTAQBAL is a member of prominent **engineering and business associations**, which are recognized as industry benchmarks.

This affiliation emphasizes MOSTAQBAL's commitment to proficiency in engineering consulting and its obligations to deliver innovative and high-quality solutions across the engineering sectors.

PEOPLE

The MOSTAQBAL Family consists of **over 200** experienced individuals who are supported by a **solid management structure** alongside internal supporting divisions and departments. We ensure the requirements and needs of our engineers are promptly addressed and that our clients are completely satisfied with the services we provide.

COMPREHENSIVE SOLUTIONS

MOSTAQBAL provides comprehensive services for complex projects. Our teams of engineers and experts are specialized in developing **innovative**, **sustainable**, and **effective** solutions that ensure our clients receive top-notch outcomes tailored to the specific needs of their projects

Energy and Power

PARTNERS

MOSTAQBAL commitment to excellence builds **long-lasting relationships** with partners and clients, driving project success in diverse industries.

GENERAL
EXPERIENCE

MIXED-USE

Specialized designs and supervision are essential for mixed-use projects due to the specific challenges, which involve a broad variety of engineering and technical construction aspects.

We recognize the challenge of designing a facility with expansion and use changes in mind, and we make the most of our extensive knowledge of all national and international building standards and codes and employ it creatively and in innovative ways to successfully carry out projects that put sustainability first.

MOSTAQBAL has distinguished mixed-use development experience in the region, including the Red Sea Resort in Saudi Arabia, the Turkish Village in Qatar, the SARAYA Aqaba, and the ABDALI Boulevard projects in Jordan.

HEALTHCARE

Quality healthcare engineering is more than building design. It's about creating supportive environments that prioritize people's wellbeing and facilitate excellent care delivery.

At MOSTAQBAL, we understand these requirements, building hospitals that put people at their heart. Our extensive track record of designing and supervising healthcare projects across Jordan puts us firmly at the forefront of engineering consultancies in the field. With a particular focus on public hospitals, we engineer healthcare facilities with the future in mind, guaranteeing positive healthcare outcomes while anticipating the challenges to come.

MOSTAQBAL served the major public healthcare sector in Jordan with over 3,000 Beds

Prince Hamza Hospital

EDUCATIONAL

Educational facilities and conducive design solutions have the potential to shape the learning experience, allowing students to fully realize their capabilities.

MOSTAQBAL provided engineering consultancy services for the design, supervision, environmental, health, safety monitoring and surveys for the construction, expansion, and renovation of many educational institutions and public schools in Jordan.

We take great pride in approaching educational facilities from a holistic design perspective, addressing the intricate needs of high-capacity venues while paying close attention to the fundamentals of accessible design.

Design & Supervision: +70 Educational Projects

Supervision of Construction: +200 Schools

Environmental, health and safety monitoring: +70 Schools

Technical and Vocational Education and Training (TVET)

CIVIC, COMMERCIAL & PUBLIC

Throughout the course of its history, MOSTAQBAL's team of engineers and consultants has been in charge of successfully completing a broad variety of building projects, whether they are for private, public, or business purposes.

Our expertise encompasses all aspects of engineering, from conventional building design to the most recent requirements for sustainability and green buildings.

MOSTAQBAL always aims to deliver innovative and adaptable designs that put the needs of people first.

Andalusia Amman

INDUSTRIAL COMPLEXES & FACILITIES

MOSTAQBAL has designed and supervised major industrial cities in Jordan, optimizing the use of space and infrastructure and taking into account the best technical practices to secure investment opportunities for the industrial sector.

We aim to fulfill each industry's specialized requirements and regulations, utilizing the best engineering techniques to ensure the resilience and efficiency of our clients' facilities.

MOSTAQBAL has provided its engineering consultancy services to a wide range of industrial sectors, including, but not limited to: Metals & Mining, Food & Beverage, Military, Aviation, Chemical, and Textiles.

JODDB Industrial Complex-Al Khaldia - Al Mafrq

ENVIRONMENT & WASTE MANAGEMENT

MOSTAQBAL has a track record of successfully completing projects that preserve nature, protect resources, and manage waste. We apply our extensive knowledge of quality assurance, monitoring protocols, and Environmental and Social Impact Assessments (ESIA) to all aspects of our business.

We carried out a number of significant environmental projects in Jordan, not only in the field of the environment but also in all critical engineering domains where the application of environmental studies became crucial to ensuring environmental sustainability and greening.

MOSTAQBAL is proud to be trusted with the development of the National Strategy for Solid Waste Management in Jordan.

WATER & WASTEWATER

Effective management of natural resources is more important than ever. In the area of water and wastewater, MOSTAQBAL provides a wide range of services, including groundwater modeling, flood studies, dams, culverts, sewage system design, and water and wastewater networks.

We have provided our design, masterplan, feasibility studies, and supervision services for a number of major projects in different governorates in Jordan, in accordance with the highest international standards.

MOSTAQBAL is now recognized as an expert in the water and wastewater sector thanks to its extensive track record of successfully completed projects.

More than 2,000 Km of Water and Wastewater Networks, and WWTP with capacities ranges from 250 to 14,000 m³/Day

BAQA'A Sewage Treatment Plant

TRANSPORTATION & ROADS

MOSTAQBAL has long experience delivering transportation and roads projects. Our design team is equipped to prepare specialized engineering solutions, whether hydrological, axel loads, pavement layer design, or intersections.

Whether it's a highway renovation or a port redevelopment, preserving the safety and integrity of our transport networks is vital for growing our economy and keeping our communities connected.

We have expertise in a wide range of projects, from the expansion, maintenance, and rehabilitation of major highways all over Jordan to the construction supervision of the Bus Rapid Transit BRT project (Package 1) connecting Amman and Zarqa.

Bus Rapid Transit BRT Project | Amman - Zarqa [Package 1]

ENERGY & POWER

MOSTAQBAL's specialized Power Unit enhances its capabilities in the power and energy sectors.

Our power unit includes the most experienced consultants across a range of power industries and is focused on satisfying the needs of both local and regional markets.

We draw on a history of excellence in providing design, supervision, and studies for several major energy, transmission and overhead power line projects in Jordan, including the site characterization for **Jordan's first nuclear power plant** and the **200-megawatt MASDAR solar power plant**.
